

PWRgenerator vs. AC Gen Integration

Use Case	AC Generator Integration	PWRgenerator
I already own a Generac Guardian HSB and want to add a PWRcell ESS.	✓	
I want full backup power for my whole home with minimal to no load management.	✓	
I want to be able to backup home loads with starting requirements > 50A.	✓	
I want to use solar and storage as much as possible during an outage and use generator power only in emergencies when solar is not available.	✓	✓
I want to use as little fuel as possible to run my generator.		✓
I value a generator that runs quietly, cleanly, and as infrequently as possible.		✓
I'm limited on wall-space and want a simple and tidy system installation.		✓
